

Geometric Dimensioning and Tolerancing

March 21-22, 2017 | 8:30 am – 4:30 pm

At

Manufacturers Resource Center
961 Marcon Boulevard, Suite 200 | Allentown, PA 18109

www.mrcpa.org

The purpose of this Two-Day course is to familiarize participants with the rules and symbols of Geometric Dimensioning and Tolerancing (GD&T). This powerful language improves communication on mechanical drawings, and has many advantages over traditional plus/minus tolerancing. Participants will learn to identify, interpret, and apply the 14 geometric characteristic symbols, as well as how they relate to datums. The proper interpretation of GD&T callouts will be covered, and how they impact manufacturing. The material is based on the ASME Y14.5-2009 Standard.

Who should attend: The course is intended for CAD designers, product engineers, manufacturing engineers, manufacturing personnel, and quality/gaging inspectors, especially those who have limited or no experience with GD&T.

Cost: \$700/person or \$650/person if 3 or more

Presented by: John-Paul Belanger, Certified Sr. GD&T Professional, Geometric Learning Systems
