

Design for Six Sigma

Webinar

October 7, 2020 | 10:00 -11:30 AM

Presenter:
Robert Tripp
Six Sigma Consultant
Certified Master Black Belt

With over 20 years of focus in the quality management arena, Rob's breadth and depth of experience combine to enable significant business results in each of his client engagements. He is part of the "original DNA" of Six Sigma, trained and certified as a Six Sigma Black Belt in AlliedSignal's first wave in 1995. By 1998 he acquired his Master Black Belt certification, at which time he began his consulting career.

Rob has trained, mentored, and certified thousands of Green Belts, Black Belts and Master Black Belts in dozens of companies across several industries around the world. Through these engagements, Rob has assessed organizational readiness, designed and led deployment strategies, developed curricula for various levels of Lean, Six Sigma, and Design for Six Sigma training, and mentored Leaders, Champions and Belts through both organizational and technical aspects of Lean Six Sigma deployments.

Registration is required for this webinar. Click on link below:

After registering, you will receive a confirmation email containing information about joining the meeting.

Session Overview:

DFSS, or Design for Six Sigma, is a method that has evolved from a core Six Sigma DMAIC approach to process improvement. Influence and popularity of DFSS has grown due to its ability to integrate with your existing product design processes, from concept to launch of production, focusing on achieving the nexus of flawless production, optimal product performance, and delighting customers at minimal cost. Join us in this session as we demonstrate the practical application of DFSS, utilizing an IDDOV (Identify, Define, Develop, Optimize and Verify) approach, at the Faurecia Clean Mobility technical center in Columbus, Indiana. Our DFSS trainer, Robert Tripp, will host the event as guests from Faurecia will share their experiences, results, and insights from their own DFSS journey.

Session Highlights:

- DFSS Overview with Robert Tripp
- Faurecia Clean Mobility project experiences and insights
- Interactive Q&A

Cost: Complimentary / No cost—*This event is made possible thanks to funding assistance through the MEP National Emergency Assistance Program.*
