

Cybersecurity Requirements for Defense Contractors

Presenter:

Jeff Williams
Cybersecurity Program Manager
Michigan Manufacturing
Technology Center

Jeff Williams is a Project Manager for The Center's cybersecurity team, leading efforts to educate and equip small and medium-sized manufacturers to guard against the growing threat of cyberattacks. One of his main areas of focus relates to the cybersecurity requirements outlined in NIST Special Publication 800-171, designed to protect the information security systems of contractors working with the Department of Defense. In addition to serving Michigan's manufacturing community, Jeff also is involved with training other MEP Centers across the U.S. This effort will enable those Centers to provide cybersecurity services to manufacturers in their states.

Webinar

December 9, 2020
10:00 AM—11:30 AM

Must register in advance for this meeting.
To register, click link below:

www.mrcpa.org/events

One week before the event, you will receive instructions to join

The Department of Defense has begun to revise the cybersecurity requirements all contractors must adhere to in order to remain part of their critical supply chain. Attend this webinar to learn about new cybersecurity developments and how they affect current and future contracts.

Primary Topics:

- Changes to Department of Defense cybersecurity requirements
- Upcoming certification requirements
- Common issues faced by contractors and how to overcome them

Target Audience: All owners, managers, and IT professionals responsible for cybersecurity compliance for contractors, subcontractors and vendors in the Department of Defense supply chain

Cost: No cost, complimentary – *This event is made possible thanks to funding assistance through the MEP National Emergency Assistance Program.*
