ISO 13485:2016 Internal Auditor Training

May 12-13, 2021 | 8:30 am – 4:30 pm

Location:
Remote Via Zoom

MRC offers a two-day internal audit training class to teach internal auditors the requirements of ISO 13485:2016 and the fundamentals of the internal audit process. This class is designed to train personnel to become qualified and confident to conduct internal audits in a positive, constructive, friendly manner. Auditors will learn to:

• Plan and schedule the audits to be conducted.
• Prepare for the specific audits to be conducted using audit preparation tools (i.e., checklists, matrices, documentation, schedules, etc.)
• Conduct internal audits required for QMS system maintenance and compliance, and identify gaps.
• Obtain and review objective evidence of compliance including Management System procedures, work instructions, supporting records, personnel feedback, and implementation practices.
• Provide written reports that identify audit results; positive implementation aspects, nonconformities that require corrective action, as well as observations and opportunities for improvement.

Auditors will be given several interactive exercises during the class. A certificate will be issued for each student who successfully completes the course.

Cost: $550/person
