Job Instruction includes effective methods to help employees quickly remember how to do a job. JI creates a standard training process that goes beyond simply “telling and showing” them.

Through TWI Job (JI) Instruction, MRC offers a dynamic program of hands-on learning and practice, imparting essential skills for supervisors, team leaders, and anyone who directs the work of others. Job Instruction training is designed to develop basic stability of your processes (Standard Work). This course teaches the method to instruct an operator how to perform a job correctly, safely and conscientiously.

What You'll Learn:

- How to correctly train employees which reduces training time
- How to generate cooperation and positive employee relations
- How to establish and maintain standardized work with improved methods
- How to solve problems efficiently and effectively
- How to deliver results with less scrap and rework
- How to create a safe work environment
- How to increase job satisfaction
