

About Our Instructors

Gene Kaschak, VP, Continuous Improvement & Leadership Development Strategy

Gene has seen first-hand how the best improvement ideas usually get started by the people doing the work every day. His early projects in continuous improvement were focused on bringing these ideas to life by listening to small suggestions or comments and designing the proposed solutions for various manufacturing, operations, maintenance, product development, and information technology projects. As a Lean Coach with MRC since 2014, Gene's focus now is to develop the scientific thinking skills in the local manufacturing community to bring these improvement ideas to life through daily experiments.

Wendy Beltzner, Director, Leadership Development and Training Strategy

Wendy's role at MRC is training and coaching business-critical Interpersonal Skills Development and conducting MRC's Supervisor Bootcamps to help every supervisor realize and optimize their potential. With her vast experience in leadership development, Wendy is also teaching manager essentials for mid-level managers. She previously worked for Fortune 500 service giants such as IBM and Manpower Inc., advancing her career from entry-level through various levels of management.

Mike Hoseus, Author, Executive Director, CQPO

Mike Hoseus is Executive Director of the Center for Quality People & Organizations (CQPO). Mike brings both manufacturing operations and specialization in Human Resource experience to CQPO. CQPO current projects with Toyota include New Hire selection and training process, Team Leader and Group Leader post promotion training, Quality Circle Leader and Manager training, and Global Problem Solving for all levels. Mike is an adjunct professor with the University of Kentucky's Lean Manufacturing Program. Mike is co author with CQPO and Dr. Jeffery Liker (Author of the Toyota Way) of Toyota Culture. Mike is also president of CMH Inc.

- All sessions will be held at MRC's training center or at local manufacturers, which will include real-life applications to enhance your learning experience.
- MRC's training programs can be customized to your company's specific needs and offered at your facility using "Learn and Experience" methods. To learn more, please contact: **Nicole Pierce, Training & Events Coordinator** at (484) 655-4873 or nicole.pierce@mrcpa.org.

Funding subsidies may apply. Please contact Diane Lewis at (610) 628-4578 or email her at: diane.lewis@mrcpa.org to see if you qualify.

Lean Certification Programs 2023

Lean strengthens your business. It engages your culture to constantly improve; saving time, money, and resources.

MRC's Lean Certification Programs emphasize strategic Lean transformation through cultural engagement and help prepare your team to manage your organization's Lean journey.

Our programs develop your change-agent skills by enhancing your ability to design Lean systems, manage relationships, and lead strategy deployment.

The Lean Certification Programs include:

- Onsite practical application of Lean tools
- Training from nationally recognized experts and local practitioners
- Hands-on classroom instruction and application in our onsite simulated factory
- One-on-one coaching for certification projects

Foundations of Lean Certification

"Without standards, there can be no improvement."

-Taiichi Ohno, Toyota

As the foundation of a Lean Enterprise, standardization sets expectations for process performance and provides the basis for problem-solving and continuous improvement. In Foundations of Lean Certification, participants will learn how to:

- Evaluate manufacturing processes to identify waste elimination opportunities
- Create standards to reduce process instability
- Generate one-way Job Methods to improve process consistency
- Create Job Breakdowns to standardize Job Instruction
- Install process checks to sustain process performance

This program features blended-learning through a mix of classroom instruction and hands-on experimentation in MRC's Lean Enterprise Works (LEW) factory simulation.

Upon completion of all course work and a passing grade in a Body of Knowledge Test, participants are "Foundations of Lean" certified by MRC.

Recommended For:

- CI Specialists
- Supervisors
- Operators
- Technicians
- Support Staff
- Office Staff

Lean Master Certification

"People don't go to Toyota to 'work' they go there to 'think'."

-Taiichi Ohno, Toyota

A Lean Enterprise is more than a collection of improvement tools, a Lean Enterprise aligns an organization's *purpose* with its *people* and its *processes*. In Lean Master Certification, participants will learn how:

- Value stream mapping can help visualize improvement opportunities
- The Scientific Method of Plan, Do, Check, Act (PDCA) can proactively and reactively eliminate the root cause of problems
- Lean Daily Management Systems can share performance information and prioritize improvement work at all levels
- Total Productive Maintenance (TPM) can create a shared ownership of equipment to maximize the operation by reducing downtime
- Managers can effectively manage conflict associated with change

Lean Master Certification is delivered by MRC and Mike Hoseus, former General Manager at Toyota. The program features blended learning through a mix of classroom instruction, instructor-led exercises at host companies, and one-on-one coaching for each participant.

MRC's Lean Master Certification is earned through the successful completion of a Standardization or PDCA project.

Recommended For:

- CI Managers
- Managers
- Engineers

Price: \$3,750

Early registration discount price \$3,350 by January 31st, 2023

- 11 days (2-3-day sessions every 3 weeks)
- Includes course materials, light breakfast, lunch, snacks and beverages
- Includes offsite session(s) hosted at local manufacturers as available*
- **Prerequisite:** Lean Foundations Certification

2023 Spring Schedule

- Week 1: March 28-30, 2023
- Week 2: April 11-12, 2023
- Week 3: April 24-26, 2023
- Week 4: May 16-17, 2023
- Week 5: June 7, 2023

* Contact Nicole Pierce if interested in hosting opportunities at your manufacturing facility

All sessions run 8:30 AM - 4:30 PM

"As a manufacturer in the greater Reading / Lehigh Valley area, we turn to MRC to provide our associates Lean Manufacturing training and skills necessary to continuously improve our processes and keep our business cost competitive. MRC does a terrific job at offering custom and standard programs that are tailored to the specific needs of today's manufacturers, and we are proud to partner with them for this training." - Tom Morse, Plant Manager, NPX ONE
