MANUFACTURING LEADERSHIP INSTITUTE: PARTICIPANT TESTIMONIALS

2016

"The MLI experience was the best course I have had in my professional career. Learning to think like a leader vs. a manager has been an awakening experience. Change has occurred immediately at ProtoCAM since graduating. I would recommend this course to anyone looking to change the culture within a company or just better themselves as a leader and a person."

~Ed Graham, ProtoCAM

2015

The MLI program provided valuable leadership training for me to improve my performance and to help drive performance improvements of my organization. I highly recommend this training for people who want to improve the performance of their manufacturing organizations.

~Ron Moritz, Lutron Electronics

2014

The MLI program really made me evaluate our company culture. Given what I learned throughout the program the changes we implement should ensure company growth and success moving forward.

~Shaun Hansen, Lightweight Manufacturing

Hands down the very best leadership course offered in the Lehigh Valley, with a fully rounded curriculum this course fills the gaps in any organization and is a "must have" for those wishing to take the business to the next level.

~Alan Fries, Packaging Corporation of America

Attending the MLI Program has been an extremely valuable asset to the future of my company. Highly respected leaders and teachers have increased my knowledge and taught me skills that will improve my management and leadership abilities. I feel fortunate that this program is available in the Lehigh Valley.

~Bonnie Haas, Kettle Creek Corp.

The MLI program is very beneficial to change paradigms of where your organization is currently and where you would like to go. Participants are challenged to apply the course learnings to move their organizations forward towards increased revenues and profitability, while meeting the company's strategic vision.

~Bill Donbar, Crayola

2013

The MLI program was exceptional at capturing and organizing the key components to strategic success in companies large and small. Success is not an accident, it is planned. This course shows you the areas of your business to analyze and improve from mission and value statements to sales, marketing, people, finance, and supply chain.

~Greg Roeder, Cardinal Systems, Inc.

2012

The experience shared inside the sessions is priceless. At the end of the program, I had a plan to not only help my organization but also myself as a leader.

~Michael Gutierrez, Bustin Industrial Products, Inc.

The content and the structure of MLI is well formatted & well rounded. I was engaged in discussing and learning about the (higher level) dynamics of leadership, more than I anticipated. This was a good investment of time. A positive professional experience.

~ Tom Doyle, Lutron Electronics Company

2011

The exchange of information was phenomenal between the class and instructors and peer to peer. The institute was unparalleled to anything I had experience prior to this.

~John Purnell, Henson Group

2010

I had been looking at several training courses to learn the skills needed for my recent position as president of a family owned business. The MLI course addressed all the skill sets and most importantly taught me the value of vision and culture in an organization. It also allows me to understand the responsibilities and duties of my staff and to better manage them.

~Brad Gammons, Trega Corporation

MLI not only helped me grow as a leader but it also helped find a clear direction for my business. This is a great opportunity for anyone interested in growing their business and themselves. Well worth the time spent.

~Jamey Maack, Industrial Metal Plating, Inc.

2009

I encourage manufacturing and business leaders to attend MLI. The tremendous advantage this course provides is the understanding and application of principles (vision, strategy, communication and finance) from a broad business spectrum from fellow participants.

~Hugh F. Boyd IV, Lutron Electronics, Inc.

2007

The program allows someone to take the view from the 'top' and a way to systematically approach decision-making in the global business environment. I was impressed with the program and the presenters.

~Stan Swierczek, Silberline Manufacturing

2006

Great program and opportunity. The subject matter really hit home and gave me the opportunity to look at our company and honestly evaluate it in comparison to the topic. I have started to use many of the tools learned and will continue to use them in the future. This was a great opportunity for me and for my company.

~George Gaiser, Lehigh Valley Plastics
