

# Lean Enterprise Overview

September 12, 2018 | 8:30 am – 4:30 pm

*Location*

EnerSys Inc.

Training & Conference Center

2366 Bernville Road, Reading, PA 19605

In this **Lean Enterprise Overview** you will be introduced to the Lean philosophy. Participants gain an understanding of value adding and non-value adding activities, as well as methods of identifying improvement opportunities. In addition, Lean tools are presented for the elimination of process waste.

This workshop includes a live simulation where participants are assigned jobs, e.g., material handler or assembler, and experience a lean transformation through hands-on activities.

You will move from the presentation format to the simulated shop floor during this workshop to apply the concepts that you learn. You will also discuss the use of visual methods to measure production system performance.

Presenter: [Mike Withka](#), MRC Senior Strategy Manager/Lean Coach

Cost: \$300/person or \$250/person for 3 or more employees

Includes Continental Breakfast, Lunch, Refreshments and Course Materials
