

Maintenance Excellence

January 15-17, 2019 | 8:30 am – 4:30 pm

Location

Host Manufacturing Facility to be Announced

In this three-day course at a local manufacturer you will be introduced to a maintenance measurement system that will help you develop an on-going strategy. You will develop a step-by-step plan to take your equipment reliability to the next level of operation. This course will help you to develop a vision and the plan you need to get there using tools such as these:

- Total Productive Maintenance
- Maintenance Mapping
- Equipment Condition Coding
- Skills Matrix
- Preventative & Predictive Maintenance
- Planning & scheduling
- Overall Equipment Effectiveness (OEE) & other useful metrics to help you stay on track

And, Maintenance Managers – Bring your boss and your Production Manager to make it a TEAM effort!

Cost: \$990/person | To Register: www.mrcpa.org/events

About the Instructor:

Larry Bouvier, CMRP

Project Manager

Fuss & O'Neil Manufacturing Solutions
