

Project Management Workshop

March 27, 2019 | April 3, 2019 | April 8, 2019 • 8:30 am – 4:30 pm

Location

Manufacturers Resource Center
961 Marcon Boulevard, Suite 200 | Allentown, PA 18109

Running a project requires a mix of skill sets and tools to create an environment that leads to success. Aligned with PMI's PMBOK®, this project management workshop helps you master the PM process and will address the 5 process Groups (Initiating, Planning, Executing, Monitoring-&-Controlling, and Closing.) We will introduce each of the 10 Knowledge areas and will touch on the 47 Project Management Processes.

Project management, when done right, is a collaborative process. With that in mind, during the workshop, participants will work together to apply the principles, tools and templates that they just learned about. These small group sessions serve to strengthen the learning experience and to help

students develop foundational proficiency with the most important project management tools.

How Will You Benefit?

Participants will learn how to deliver projects successfully. Participants will complete the workshop with knowledge of how to use project management tools to deliver projects predictably, with higher value and lower cost.

Who Should Take This Workshop

Those who are new to project management. Those who will have project managers reporting to them. Those who support projects but do not manage them directly. This would include project team members; subject matter experts and department heads whose people will be supporting projects.

Cost: \$795/person | See Course Outline and Registration: www.mrcpa.org/events

Presenter:

Don Ortner
Vice President | PMP®
[ESPI](http://www.espi.com)

Don has extensive consulting experience collaborating with C-level teams and functional management to implement changes leading to improved revenue and profitability.
