

Training Within Industry (TWI) Job Instruction (JI)

Free Breakfast & Learn

February 19, 2020 | 8:30 am – 10:30 am

Location:

MRC | 7200A Windsor Drive | Allentown, PA 18106

TWI's rich history originated in the United States in the 1940s and this training method was a resounding success. The program was born out of the need to rapidly train unskilled workers entering the production

workforce as many skilled laborers went off to war.

Today, many of our manufacturers struggle with onboarding and enabling new employees to be productive and error free quickly. In this session, you will learn what TWI Job Instruction (JI) is all about and how it can help you gain the benefits of a consistent training program. You will see a demonstration of the methodology and gain insight into why it works.

With JI you gain the benefits of consistent training while developing a stable process to apply continuous improvement. This program teaches the JI method to instruct an operator how to perform a job correctly, safely and conscientiously. TWI has the proven ability to:

- Generate cooperation and positive employee relations;
- Teach supervisors how to quickly and correctly train employees;
- Establish and maintain standardized work;
- Improve methods;
- Solve problems efficiently and effectively;
- Create a safe work environment;
- Shorten the learning curve;
- On-board new or transferred employees faster; and
- Reduce or eliminate errors and mistakes.

Target Audience: Supervisors, Team Leaders, and anyone who directs the work of others.

Presenter: Angie Bove, Strategy Manager/Training & Development at MRC

Registration is required: Go to <http://www.mrcpa.org/events>
