Industrial Metal Plating	Wacker Chemical
Kitchen Magic	

"The MLI experience was the best course I have had in my professional career, Learning to think like a leader vs. a manager has been an awakening experience. Change has occurred immediately at ProtoCAM since graduating. I would recommend this course to anyone looking to change the culture within a company or just better themselves as a leader and a person."

Ed Graham, ProtoCAM,

"With MLI the Manufacturers Resource Center has succeeded in developing a program that pulls together a varied group of expert speakers and hands you a concise run-down on what you need to know, right now! As you step through the program, you realize the biggest issues are introspective and it challenges your own sense of how to be a leader."

Andrew Hopton, Hydac USA

"My experience with the MLI program was outstanding.. The instructors are top notch professionals that provided our class with practical, as well as state-of-the-art curriculum. The combination of instruction, structured exercises, and class interaction made for an excellent learning experience. I would heavily recommend the program."

"Hands down the very best leadership course offered in the Lehigh Valley, with a fully rounded curriculum. This course fills the gaps in any organization and is a "must have" for those wishing to take the business to a new level."

Alan Fries, Packaging Corporation of America

Rick Seibert, Sharp

"The exchange of information was phenomenal between the class and instructors and peer to peer. The Institute was unparalleled to anything I had experienced prior to this."

John Parnell, Henson Group

"The MLI program was exceptional at capturing and organizing the key components to strategic success in companies large and small. Success is not an accident, it is planned. This course shows you the areas of your business to analyze and improve from mission and value statements to sales, marketing, people, finance, and supply chain."

Greg Roeder, Cardinal Systems Inc.

"MLI not only helped me grow as a leader but it also helped find a clear direction for my business and myself. Well worth the time spent."

Jamey Maack, Industrial Metal Plating

"The program allows someone to take the view from the 'top' and a way to systematically approach decision-making in the global business environment. I was impressed with the program and the presenters."

Stan Swierczek, Silberline Manufacturing

"I encourage manufacturing and business leaders to attend MLI. The tremendous advantage this course provides is the understanding and application of principles (vision, strategy, communication, and finance) from a broad business spectrum from fellow participants."

Hugh F. Boyd IV, Lutron Electronics, Inc.
