

Discover the Power of Predictive Maintenance: Enhancing Your Organization's Efficiency

2023

Complimentary Breakfast & Learn

Join us on June 15th, 2023, from 8:30 AM to 10:00 AM, for a complimentary Breakfast and Learn session focused on the benefits of incorporating Predictive Maintenance (PdM) into your organization. By utilizing advanced technologies and data-driven insights, PdM enables failures, reducing unplanned downtime and optimizing productivity.

When combined with a robust Preventive Maintenance (PM) approach, PdM can significantly enhance the reliability and performance of your equipment. PM tasks address known maintenance requirements based on schedules or usage thresholds, while PdM allows for early detection of potential failures, enabling timely intervention and eliminating costly disruptions.

Leveraging a Computerized Maintenance Management System (CMMS) is vital for successful implementation. With a CMMS, you can seamlessly coordinate PdM and PM activities, track downtime events, analyze trends, and gain valuable insights for future planning. By taking a holistic view of your maintenance operations, you can make informed decisions, optimize resources, and enhance overall organizational efficiency.

Don't miss this exclusive opportunity to gain a competitive edge in your industry. Reserve your spot today and join us on June 15th to uncover the transformative potential of Predictive Maintenance. Experience firsthand how PdM, in conjunction with PM and a CMMS, can revolutionize your maintenance practices, reduce downtime, and maximize operational effectiveness.

Who Should Attend

Maintenance managers, engineers, supervisors, planners, or anyone who has a direct interest in building and sustaining a world-class maintenance program.

Visit mrcpa.org/events for full event details.

**Presented by | Jeffrey Craig, CMRP | Reliability & Maintenance Professional |
Fuss & O'Neill Manufacturing Solutions**

Jeff has more than 30 years of experience in Engineering and Maintenance Management. A natural leader, Jeff has spent his career training both civilians and military personnel in the art of technical and program management. He is an expert in safety program management and has extensive process improvement experience.

As a Reliability and Maintenance Professional for Fuss & O'Neill's Manufacturing Solutions, Jeff works with clients to integrate total process management to improve efficiency, safety, and the bottom line. Jeff is an expert and proponent of TPM (Total Productive Maintenance) and Maintenance Excellence procedures because he has seen, firsthand, the benefits these practices bring. He integrates his practical experience into classes to emphasize real-world applications and to effectively communicate the subject matter. He focuses on individualized client attention and recognizes that an off-the-shelf approach is never an option.

There is no cost to attend this event, however, prior registration is required.
