

Fundamentals of Maintenance Management

Feb. 6 – Feb. 7, 2024

In order to help participants learn to lead a maintenance organization, this two-day Fundamentals of Maintenance Management workshop teaches strategies and tactics that will: motivate staff; examine the financial aspects of driving profitability; address safety and environmental concerns; suggest systems to create a culture of proactive maintenance, and much more. This workshop will be hosted at a local manufacturing facility and will provide the hands-on skills and strategies to make the switch from firefighting to true Maintenance Excellence.

Course Highlights

- Strategies and tactics required to successfully motivate your staff to grow and excel
- Financial aspects of how you will be able to drive profitability
- Safety and Environmental concerns every manager must successfully navigate
- Systems you can implement that will bring about a culture change from reactive to proactive maintenance
- Methods critical to help keep you and your people organized and optimized
- Technical challenges of your business and how to meet and exceed them

Visit mrcpa.org/events for full course details.

Who Should Attend

The program is aimed at current and aspiring maintenance managers, engineers, supervisors, planners, or anyone who has a direct interest in building and sustaining a world-class maintenance program.

Instructor | Jeffrey Craig, CMRP | Reliability & Maintenance Professional |
Fuss & O'Neill Manufacturing Solutions

Jeff has more than 30 years of experience in Engineering and Maintenance Management. A natural leader, Jeff has spent his career training both civilians and military personnel in the art of technical and program management. He is an expert in safety program management and has extensive process improvement experience.

As a Reliability and Maintenance Professional for Fuss & O'Neill's Manufacturing Solutions, Jeff works with clients to integrate total process management to improve efficiency, safety, and the bottom line. Jeff is an expert and proponent of TPM (Total Productive Maintenance) and Maintenance Excellence procedures because he has seen, firsthand, the benefits these practices bring. He integrates his practical experience into classes to emphasize real-world applications and to effectively communicate the subject matter. He focuses on individualized client attention and recognizes that an off-the-shelf approach is never an option.
