

Introduction to Preventive and Predictive Maintenance

Mar. 12 – Mar. 14, 2024

Reliable equipment is only achievable with a proactive approach. Preventive (PM) and Predictive (PDM) maintenance are the tactical activities companies must embrace.

This three-day course will be conducted off-site at a local manufacturer and will provide the hands-on skills and strategies you need while learning the fundamentals of Preventive and Predictive Maintenance.

Course Highlights

- Learn how to create world class preventive maintenance inspections
- Illustrate predictive technologies and how you can start using them immediately
- Create an effective PM & PDM program
- Optimize existing PMs and show how to measure their effectiveness

Visit mrcpa.org/events for full course details.

Who Should Attend

The program is aimed at current and aspiring maintenance managers, engineers, supervisors, planners, or anyone who has a direct interest in building and sustaining a world-class maintenance program.

Instructor | Jeffrey Craig, CMRP | Reliability & Maintenance Professional |
Fuss & O'Neill Manufacturing Solutions

Jeff has more than 30 years of experience in Engineering and Maintenance Management. A natural leader, Jeff has spent his career training both civilians and military personnel in the art of technical and program management. He is an expert in safety program management and has extensive process improvement experience.

As a Reliability and Maintenance Professional for Fuss & O'Neill's Manufacturing Solutions, Jeff works with clients to integrate total process management to improve efficiency, safety, and the bottom line. Jeff is an expert and proponent of TPM (Total Productive Maintenance) and Maintenance Excellence procedures because he has seen, firsthand, the benefits these practices bring. He integrates his practical experience into classes to emphasize real-world applications and to effectively communicate the subject matter. He focuses on individualized client attention and recognizes that an off-the-shelf approach is never an option.
