

ISO 13485:2016

Internal Auditor Training

Mar. 23 - 24, 2026

*Virtual Course

A strong internal auditing program is essential to maintaining and continually improving a Quality Management System (QMS) and to meeting ISO 13485 certification requirements.

MRC's two-day Internal Audit Training teaches participants the ISO 13485 standard and the fundamentals of the internal audit process. The course prepares internal auditors to conduct audits in a positive, constructive, and professional manner.

Course Highlights

Participants will learn how to:

- Plan and schedule internal audits
- Prepare for audits using effective tools such as checklists, matrices, documentation, and schedules
- Conduct internal audits in accordance with ISO 13485 requirements and identify compliance gaps
- Collect and evaluate objective evidence, including procedures, work instructions, records, personnel input, and implementation practices
- Develop clear written audit reports that document strengths, nonconformities requiring corrective action, observations, and opportunities for improvement

Auditors are trained to support the success of their own functional areas while objectively auditing other areas of the organization (auditors may not audit their own work). This approach promotes cross-functional collaboration, communication, and relationship building. The course includes multiple interactive exercises, and participants who successfully complete the training will receive a certificate.

Who Should Attend

CEOs, Senior Management, Middle Management, Production Control/Materials, Quality, Buyers/Planners, Engineering, Shop Floor Supervisor, and Production Employees

Instructor | Wanda Torres, Business Management, Consultant - WCH Professional Services

Wanda is a quality professional with over 20 years of experience in quality assurance, regulatory compliance, and continuous improvement. She is an MBA graduate from DeVry University and has a bachelor's degree in science. During her career, she has implemented and guided certification efforts on ISO 9001, ISO 13485, FDA Quality System Regulation for medical devices, and cGMP's for pharma businesses. Wanda has provided consulting services and supported industry efforts to obtain certifications in a variety of standards, including AS9100, ISO 14001, ISO 17025, ISO 27001, and ISO 45001. She is also a trainer for Metrology concepts, GD&T ASME Y14.5, SPC, and Lean Six Sigma tools and methodology. Wanda is a Certified Lean Six Sigma Green Belt, an ASQ Certified Quality Engineer, and Judge and trainer for the International Team Excellence Award competition at the ASQ World Conference.
