

Automation & Manufacturing TECHNOLOGY SHOW

Altitude Marketing | JPMorganChase | TACTIX

Apr. 15, 2026

Agenda

- 7:30-8:00 AM Registration & Breakfast
- 8:00-8:15 AM Sponsor Introductions | Diane Lewis, VP Manufacturing Solutions & Center Operations, MRC
Sponsors: Altitude Marketing | J.P. Morgan Chase | TACTIX
- 8:15-8:30 AM Shawn Furman, Director, AMT Strategy, MRC | Where Manufacturers Are Winning with Automation – And Why People Still Come First
- 8:30-9:30 AM Kevin Wadiak, Just Born | Just Born MES Journey – Implementing a Manufacturing Execution System
Manufacturer Case Studies
Danielle Hess, Highwood USA – Empowering Teams to Build Better Operations
Andrew Buczewski, Viwinco – AI in Manufacturing: A Window Manufacturer’s Perspective
- 9:30-9:50 AM Panel Discussion
- 9:50-12 PM Technology Demonstrations and Discussion on the Floor

- AI / Manufacturing Operations Software
- Custom Machine Builders / Turnkey Systems
- Industrial Automation Distributors
- Industry Support / Engineering Services
- Robotics & Motion Specialists
- Systems Integrators
- Sponsors

AMT Show Exhibitors

AI / Manufacturing Operations Software

- **Copia** provides software that helps manufacturers manage, track, and protect industrial automation code and devices, improving uptime, security, and efficiency across production systems.
- **Kissinger** helps businesses improve efficiency and profitability by selecting, implementing, and integrating ERP and other business management software systems.
- **Rheo** An AI-powered operations platform that helps manufacturing teams make better decisions through automation and real-time, data-driven guidance across shop floor operations, safety, quality, and maintenance.
- **TIW Alere** A versatile ERP provider that fits almost any industry and receives exceptional reviews from its customers.

Custom Machine Builders

- **Advent Design** An innovative leader in robotics, safety, and automation for over 40 years.
- **Omnitech Automation** A turn-key solutions provider of automated manufacturing equipment and services.
- **DEMCO Automation** Offers a range of services from providing entire turnkey automation systems to on-site service for existing equipment.

Industrial Automation Distributors

- **Applied Controls** A local high tech automation distributor and solutions provider.
 - **Engineered Automation Components** Represent automation components and assembly equipment in the Assembly Automation and Process Control industries.
 - **Euchner** Industrial safety engineering specialists that design and produce customized products and solutions that minimize hazards and risks, protecting people and processes across various sectors by guarding machines and installations.
 - **SICK** Optimize your logistics processes from goods receipt, warehousing through to distribution with modern sensor solutions.
 - **Siemens** Leverages Industrial AI to analyze large datasets, integrate physical and digital systems through digital twins, and operate smart, automated machines with advanced software.
 - **Universal Robots** Provides solutions that help your team increase equipment uptime, improve performance, boost productivity, and maintain a safer, more efficient workplace.
- **Automation Works**
- **EAC** represents automation components and assembly equipment in the Assembly Automation and Process Control industries.
- **NEFF** Offers top-quality products from leading manufacturers, supported by a team of engineers who help clients improve process efficiency and business profitability.
- **Shingle and Gibb** East Coast's premier industrial automation distributor.
 - **Banner** Offers products and solutions including sensors, wireless solutions, machine safety, indication and LED lighting.
 - **Turck** develops and manufactures industrial automation products such as sensors, connectivity, RFID, and control systems that help companies automate machines, processes, and production lines to improve efficiency and reliability.

Industry Support / Engineering Services

- **PennTAP** provides technical assistance, expert guidance, and university resources to help Pennsylvania businesses improve efficiency, adopt new technology, and stay competitive.
- **Fuss & O'Neill** A multidisciplinary engineering firm that provides client-specific, forward-thinking, and holistic solutions.
- **FrommConnect** Provides comprehensive service solutions that enhance efficiency, reduce labor costs, and deliver technical support and system upgrades.

Robotics & Motion Specialists

- **BCS Motion** Robotics and Motion automation solutions.
- **MuL Technologies** builds autonomous robotic carts that help automate material handling and improve efficiency.
- **wIQ Engineering** helps manufacturers improve productivity and quality by designing and implementing robotic welding automation and providing practical engineering support for shop-floor operations.

Systems Integrators

- **ATC Automation** provides highly engineered solutions and systems for a variety of industries.
- **EVO Integration** designs customized equipment and process solutions to help improve efficiency and stay competitive.
- **GRANTEK** Automates manufacturing operations and integrates business systems for life sciences, pharmaceuticals, food & beverage, and CPG industries.
- **Inflection Point** is an independent systems integrator that helps organizations improve efficiency, safety, and performance by designing and implementing automation and data-driven technology systems.
- **Multi-Dimensional Integration (MDI)** Systems integrator specializing in upgrading existing automation systems, designing new ones, or providing support for a time-sensitive issue.
