

True Economic Impact of Workplace Injury

Complimentary Webinar

WORK
SAFETY

September 9, 2026

Workplace injury is more than a safety concern, it is a significant financial, operational, and workforce challenge facing organizations in high-risk industries.

This webinar explores the true economic impact of workplace injury, including lost-time and presenteeism, while examining the effects on operations, leadership, employees, and organizational culture.

Participants will learn why injuries occur and how Prevention & Performance principles can reduce risk and enhance workforce capability.

 **Sep. 09, 2026**

 **10:00 AM – 11:30 AM**

 **Complimentary Webinar**

 **Virtual via Zoom**

 **Registration is required:**

Times subject to change. Visit mrcca.org/events for current details.

Webinar Highlights

- Understand the true economic impact of workplace injury beyond workers' compensation costs alone
- Learn how lost-time injuries and presenteeism create significant financial and operational consequences
- Explore how workplace injury affects leadership capacity, workforce stability, and organizational culture
- Understand why workplace injuries occur through the principles of Mechanics, Load, and Environment
- Discover how Prevention & Performance principles can help organizations reduce risk and enhance workforce capability

Who Should Attend

This webinar is ideal for CEO's / Owners, CFO's, EHS / Safety, Human Resources, and Operational Leadership

Presenter

Frank McHugh | Co-Founder | WORKFORM

Frank McHugh is a Doctor of Physical Therapy and co-founder of WORKFORM, a company dedicated to helping organizations improve workforce health and performance. He earned his B.S. in Health & Exercise Science from Rowan University in 2020 and his Doctorate of Physical Therapy from DeSales University in 2023.

With firsthand experience in construction, landscaping, warehousing, and retail, Frank understands the physical demands faced by hard-working employees. After overcoming his own athletic and work-related injuries, including multiple knee surgeries and significant back injury, he developed a passion for educating others on movement, injury prevention, and sustainable performance.
