

## Partner with the Experts

With over 35 years of experience in the manufacturing industry, MRC has a proven track record of delivering exceptional results to our clients. Our team of skilled engineers and consultants are knowledgeable in smart manufacturing and automation and have a deep understanding of the unique challenges and opportunities in the manufacturing sector.

We are committed to providing personalized services that align with your business goals and drive sustainable success.

Small and mid-sized manufacturers face the same pressures as the big players – rising costs, labor shortages, and the push to do more with what you have.

MRC brings smart manufacturing and technology scaled to your operation, not a Fortune 500 budget. We help you reduce costly downtime, eliminate shop floor

bottlenecks, compete for contracts demanding tighter tolerances and faster turnaround, and shift your workforce from repetitive tasks to higher-value roles.

Whether you're running with 20 employees or 200+, MRC meets you where you are and builds a path forward. Contact MRC today and let's talk about what the right technology can do for your business.

# SMART MANUFACTURING AND TECHNOLOGY

## EMPOWER YOUR PRODUCTION AND EVOLVE YOUR BUSINESS THROUGH SMART MANUFACTURING AND TECHNOLOGY.

MRC specializes in providing Smart Manufacturing and Technology services that help you stay ahead in today's competitive manufacturing landscape. Our comprehensive suite of services is designed to optimize your manufacturing processes, increase productivity, and enhance product quality while reducing costs.

# Automation That Actually Works on Your Floor

Most manufacturers know they should be looking at automation, but figuring out where to start (or what's worth it) is the hard part. That's where MRC comes in. We work alongside small and mid-sized manufacturers to identify practical opportunities to improve safety, quality, delivery, and cost—using the right mix of lean and automation. No buzzwords. No over-engineering. Just real solutions that fit your operation.

## Start with a Smart Manufacturing Discovery Walk

Not sure where automation fits? Start here. Our Smart Manufacturing Discovery Walks are hands-on, on-site working sessions designed to:

- Walk your process with your team
- Identify real opportunities (not theoretical ones)
- Prioritize what's worth doing—and what's not
- Outline next steps based on ROI and practicality

Sessions can be scheduled on demand and are tailored to your operation. Learn more at: [mrcpa.org/walk](http://mrcpa.org/walk)

## Built for Manufacturers Like You

Our team has real industry experience. We've been in plants, solved problems, and implemented systems that had to work the first time. We understand the day-to-day pressures manufacturers face and bring a practical, roll-up-your-sleeves approach to every engagement.

- We help you:
- Make sense of automation options
  - Avoid overcomplicating solutions
  - Align improvements with your business goals

## Focus on What Pays Off

Every project should make sense financially. We take a disciplined approach to identifying opportunities that deliver measurable impact, so you're not investing time and capital into solutions that don't move the needle.

- We help you:
- Reduce waste and manual effort
  - Improve consistency and first-pass quality
  - Make smarter investment decisions

# Improve the Process First, Then Automate

Automation works best when it's built on a solid process. Without that foundation, even the best technology can fall short or create new challenges. We help ensure your processes are stable, efficient, and ready for the right level of automation.

- We work with your team to:
- Understand current challenges
  - Improve the process using lean principles
  - Apply automation where it actually adds value

**Practical Technology, Applied the Right Way.** From simple improvements to more advanced systems, we help you apply technology in a way that fits your operation, not someone else's. Our focus is on solutions your team can support, sustain, and scale over time without unnecessary complexity.

## Better Visibility, Better Decisions

By turning raw data into clear, actionable insights, your team can respond quicker, reduce guesswork, and continuously improve performance across the operation.

- We help you:
- Capture and use production data
  - Improve traceability and reporting
  - Make faster, more informed decisions

# Build Knowledge Before You Invest

From first exploration to full implementation, MRC offers workshops and forums that help manufacturers understand, evaluate, and apply smart manufacturing technologies.

**AI Essentials**  
Practical applications of AI in manufacturing

**Automation Essentials**  
Discover automation technologies that fit your operation

**Smart Manufacturing Forum**  
Connect with peers and learn from real-world implementations
