AI on the Shop Floor
A Hands-On Demo for Manufacturers
Dec. 10, 2026

Curious about AI but not sure where it fits in your plant? Join us for a practical, hands-on morning where you'll see three AI solutions working on a real assembly line, not just on slides.

Over breakfast and three interactive sessions, you'll watch each technology in action, try it yourself, and talk directly with the people who built it. You'll leave with a clear picture of what these tools do, what it takes to get started, and where they could make a difference in your own operation.

- Dec. 10, 2026
- 8 AM – 12 PM
- No fee. Registration Required.
- MRC 7200A Windsor Dr. | Allentown, PA
- Register: mrcpa.org/events

Visit mrcpa.org/events for current details.

Featured Solutions:

Get up close with the technologies, meet the people behind them, and see firsthand how AI can help solve everyday manufacturing challenges

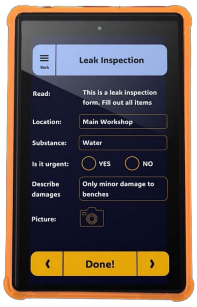

Folio Fleets: Replace paper instructions with simple, AI-built digital instructions on dedicated shop floor tablets. See how quickly assembly instructions can be created, updated, and put in operators' hands.

Murray Mentor: Capture the know-how of your most experienced people before it walks out the door. See how a voice-driven AI mentor preserves expert knowledge and guides newer team members on the job.

Rheo: Meet your virtual continuous improvement assistant. Rheo learns your process, spots sources of waste, and recommends improvements your team can act on.

Ideal for updating job instructions for assembling blocks in the factory.

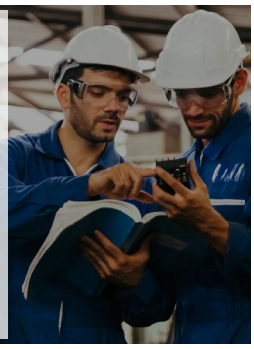

folio.

Virtual CI assistant that learns a process, identifies sources of waste, and suggests improvements.

RHEO

Who Should Attend:

Owners, plant & operations managers, CI & engineering leaders, and training managers at small and mid-sized manufacturers.

Agenda (subject to change)

- 8:00-8:30 AM Continental Breakfast and Networking
- 8:30-8:40 AM Welcome & Agenda
- 8:40-9:40 AM **Folio Fleets** | Reduce paperwork on the shop floor
